

Trying To Find Affordable Options For Employee Healthcare?

SummitCares is an affordable program offered by the Summit Community Care Clinic that includes Primary Medical Care, Behavioral Health and Dental Care. SummitCares offers services to employees and their dependents within a company or organization. Employees may choose to opt out if they and/or their dependents are covered under another plan.

The program of services is ideal for those who have no health insurance or who have a high deductible/catastrophic insurance plan. And while the Clinic does not offer specialty care or major medical care, it does have a robust referral department that will assist members of SummitCares in finding affordable options for those services, should they be needed.

Fees are per month, per individual covered, and employers will receive a quarterly invoice. Employers may choose to cover that fee per employee/dependent completely – or share that cost with the covered individual. And a quarterly reconciliation of covered individuals allows for flexibility for those companies with seasonal employees.
